Why FTE!

automotive
a Valeo brand

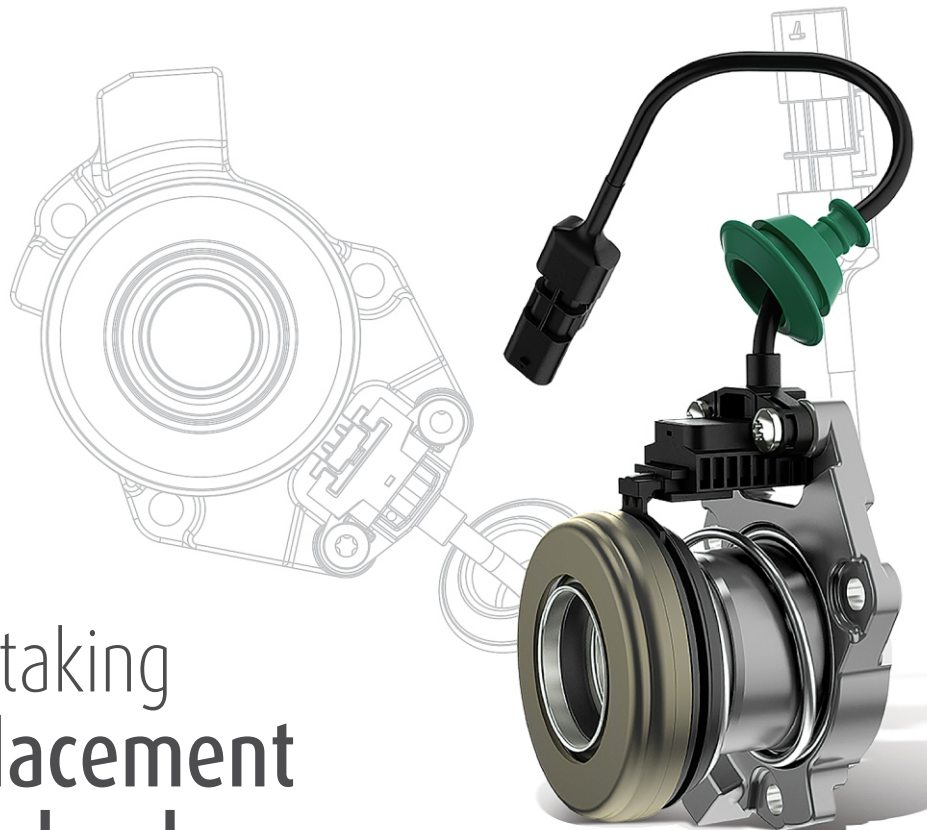

FTE automotive (a Valeo brand) has been a highly valued partner to the automotive industry for over 70 years, recognized worldwide for its outstanding performance and innovation.

As the largest single supplier of clutch hydraulics, internationally leading vehicle manufacturers rely on our commitment, offering:

- Trusted Original Equipment Supplier
- Strong engineering and manufacturing competencies that use engineering plastics where possible, serving as great alternatives to metals by offering equal durability, better heat dissipation and lower weight
- Strict quality control for high quality products through burst strength testing reaching over 1450 PSI - higher than competitors
- Best in class clutch release bearings

There's no mistaking
Original Replacement
+ Leading Technology

CLUTCH MASTER CYLINDERS

SPECIAL FEATURES

- highest reliability
- high efficiency
- displacement and position sensors can be integrated
- high stiffness and burst strength
- cost effective and low weight
- high corrosion resistance
- compact, flexible design
- quick connectors for pressure and feeder connection
- pedal stop inside master cylinder
- piston of master cylinder is returned by a pedal-return-spring
- suitable for recycling
- easy assembly by twist lock and quick connector to the pedal
- integrated tightening to the dash, insulation of engine noise
- low pressure compensation valve
- low volume absorption
- tight tolerances

CLUTCH RELEASE CYLINDERS

CONCENTRIC SLAVE CYLINDERS

SPECIAL FEATURES

- high product life
- sensor can be integrated
- integration of Peak Torque Limiter (PTL) possible
- high efficiency due to low hysteresis means low pedal effort
- high temperature resistance
- integrated high performance light weight thrust bearing with special high performance lubricant for max. heat resistance
- integrated automatic adjustment to compensate clutch wear
- integration of input shaft seal possible
- quick connectors for fast and reliable assembly
- suitable for recycling
- integration of cover for gear box possible
- high assembly and function reliability
- weight reduction due to lack of actuation lever, shaft and bearing guide sleeve
- by one piece housings no tension load on attachment screw from hydraulic pressure
- compact design

SPECIAL FEATURES

- high product life
- high efficiency due to low hysteresis means low pedal effort
- integration of displacement sensor possible
- Peak Torque Limiter (PTL) can be integrated
- automatic adjustment to compensate clutch wear
- quick connectors for reliable and fast mounting
- suitable for recycling
- high mounting and function reliability
- compact construction
- low weight
- bearing pro-load by clutch slave spring
- cost effective
